## Healthcare as a Human Rights Issue

### Normative Profile, Conflicts and Implementation

This book deals with various facets of the human right to health: its normative profile as a universal right, current political and legal conflicts and contextualized implementation in different healthcare systems. The authors come from different countries and disciplines – law, political science, ethics, medicine etc. – and bring together a broad variety of academic and practical perspectives. The volume contains selected contributions of the international conference "The Right to Health - an Empty Promise?" held in September 2015 in Berlin and organized by the Emerging Field Initiative Project "Human Rights in Healthcare" (University of Erlangen-Nürnberg).

**Sabine Klotz** (Dipl.-Pol.) is researcher at the chair in Human Rights and Human Rights Politics at the University of Erlangen-Nuremberg.
